FROM MALAYSIA'S FORESTS TO THE WORLD CERTIFIED BY MTCS/PEFC

ASSURING A **SUSTAINABLE, TRANSPARENT** AND **TRACEABLE** SUPPLY CHAIN
FROM FOREST TO FINAL PRODUCT

MTCC **COC**
FAQS

Everything you need to know
about MTCS/PEFC Chain of
Custody certification

GENERAL INFORMATION

1. What is the MTCS/PEFC Chain of Custody (COC) Certification?

Chain of Custody (COC) Certification is a process that tracks forest-based products throughout the supply chain—from forests to the final consumer—to verify their origin from legal and sustainably managed sources in accordance with established standards. This certification ensures transparency, upholds the credibility of sustainable forest management practices, and facilitates market access for certified products by meeting global sustainability requirements.

2. What is the difference between PEFC-certified and non PEFC-certified material?

PEFC-certified materials are sourced from sustainably managed forests in compliance with PEFC Sustainable Forest Management (SFM). Non-PEFC-certified materials originate from areas not certified under PEFC. However, the materials can be classified as PEFC Controlled Sources upon successful completion of a risk assessment, resulting as having negligible risk.

3. How many standards are there under the PEFC COC?

There are three standards under PEFC COC:

[PEFC ST 2001:2020 PEFC Trademark Rules – Requirements](#)

[PEFC ST 2002:2020 Chain of Custody of Forest and Tree Based Products – Requirements](#)

[PEFC ST 2003:2020 Requirements for Certification Bodies operating Certification against the PEFC International Chain of Custody Standard](#)

APPLICATION PROCESS

4. Who can apply for PEFC COC certification?

Any business handling forest and tree based products such as sawmills, manufacturers, retailers, traders can apply if they process, trade, or sell certified materials.

5. Can I apply for PEFC COC certification if I run a small business?

Yes! PEFC COC certification is accessible to businesses of all sizes. The standard also offers tailored support for SMEs, including group certification options to reduce costs and simplify audit processes.

6. What are the steps involved in applying for PEFC COC certification?

Keys steps in certification implementation:

1. Develop dossiers and documents according to the requirements of chain of custody standards.
2. Select and contract with an accredited Certification Body Notified by MTCS/PEFC.
3. The certification body evaluates and issues a PEFC COC certificate if it meets the requirements.
4. The certification body conducts annual surveillance audits to maintain the certificate.

7. Where can I find a list of accredited certification bodies?

[Scan the QR code to access the list of certification bodies under MTCS.](#)

COSTS & TIMELINE

8. How much does it cost and how long does it take to become PEFC certified?

PEFC and MTCC play no role in audit pricing. The cost of obtaining PEFC COC certification is determined by Certification Bodies (CBs), so prices may vary. Audit duration depends on variables like company size, number of sites, and supply chain complexity.

In Malaysia, certification typically costs RM6,000 - RM10,000. For exact quotation and audit schedule, you may reach out to MTCS-listed CBs.

9. Are there any financial incentives available to support embracing PEFC COC certification?

All MTCS/PEFC COC certificate holders qualify for tax deductions on expenses incurred to obtain and maintain certification.

Eligible companies have access to double tax deductible for new certification under 34 6(ma), MTCS/PEFC COC holders are eligible for a double tax deduction in the first year of certification. For subsequent years, they may claim the normal tax deduction under Section 33 of the Income Tax Act.

How to apply:

- **Submit your application** to the Inland Revenue Board of Malaysia (LHDN) for both deductions.

- You need to keep copies of your accredited certificates and payment receipts of the cost imposed in obtaining certification.

Claiming these tax deductions, you can reduce the cost of maintaining your MTCS/PEFC certification. This makes sustainable practices more financially rewarding for businesses in the Malaysian timber industry.

10. How long is COC certification valid?

COC certificates are valid for a maximum of 5 years, subject to annual surveillance audits to ensure ongoing compliance with certification standards.

CERTIFICATION SCOPE

11. What are examples of products that can be certified under PEFC COC?

PEFC COC standard covers all forest and tree-based materials such as sawn timber, plywood, paper, flooring, sawdust etc.

12. Can COC certification apply to recycled timber products?

Yes. Materials meeting the PEFC definition and requirements for recycled material may be incorporated into the COC supply chain for certified product manufacturing, provided that the following requirements are met:

- Documentation that verifies the material's origin.
- Compliance with PEFC's recycled material definition is fully demonstrated.

13. Can COC certification apply to oil palm trunk and its derivatives?

Oil palm trunk and its derivatives on its own cannot be included under the current PEFC COC standard, as they are not classified as forest and tree-based products. However, they may be used as part of forest and tree-based products as neutral material.

Neutral material:

Clause 3.20 PEFC ST 2002:2020: Material category for material other than forest and tree based material, such as metal or plastic, not taken into account in the calculation of certified content of a product group.

COMPLIANCE & REQUIREMENTS

14. Do all of my suppliers need to be PEFC certified to claim PEFC COC certification and use the PEFC Trademark?

Yes. Suppliers must hold a valid PEFC COC certification to transfer the PEFC claim and use the PEFC Trademark for their products when selling to buyers.

15. Can I source materials from non-certified area?

Yes. If these materials successfully pass the Due Diligence System (DDS), they may carry the PEFC Controlled Sources claim.

16. What if my product is only partially certified?

PEFC COC standard allows the mixing of PEFC-certified materials with PEFC Controlled Sources materials under the percentage-based method. This allows for percentage-based claim (e.g., 70% PEFC-certified plywood).

17. What happens if nonconformities are found during an audit?

Organisations must address and resolve all identified nonconformities through appropriate corrective actions before certification is granted. The requirements vary depending on the audit stage:

- Initial certification – major and minor nonconformities shall be corrected.
- Recertification – major nonconformities shall be corrected; minor nonconformities shall be verified no later than the next audit.

18. How do I handle subcontractors in my COC system?

Subcontractors are the responsibility of the COC organisation. The organisation shall establish a written agreement with all outsourcing entities, ensuring that:

- **Material segregation:** All material/products covered under the organisation's PEFC COC are physically separated from other non-certified material or products.
- **Audit access:** The organisation has access to the entity's site(s) for internal and external audits of outsourced activities for conformity with the requirements of this standard.

19. Can I implement a COC system without obtaining certification?

Yes, you can implement a COC system internally without formal certification. This helps track material origins and improves supply chain transparency while preparing for future certification by aligning with PEFC ST 2002 requirements.

However, without certification, you cannot use the PEFC label or make certified claims to buyers. Subsequently, market access requiring PEFC certification remains unavailable to you until formal certification is obtained.

SUPPLIER & SOURCING

20. Where can I find a list of PEFC COC certified suppliers?

[PEFC Database](#) for global PEFC certification records.

[MTCC website](#) for Malaysia-specific list of PEFC COC suppliers.

21. Where can I find more information about MTCS/PEFC COC standards and requirements?

For further information, visit the [MTCC website](#) or email coc@mtcc.com.my

PEFC TRADEMARK & LABEL USAGE

22. What are PEFC Trademarks?

The PEFC trademarks are symbols that represent the visual identity of PEFC. They are registered and belong to the PEFC Council. There are two PEFC trademarks:

- a) The initials “PEFC”; and
- b) The PEFC logo. It consists of two trees surrounded by an arrow. The “PEFC” initials stand underneath it. The PEFC logo shall always be used within the PEFC labels.

23. Do I have to sign the PEFC Trademarks agreement if I do not intend to use it?

All PEFC COC certified organisations must sign the PEFC Trademarks Usage Agreement, irrespective of their intent to use the trademarks. However, the practical application of PEFC Trademarks remains optional.

24. Can I use the PEFC Trademark for promotional materials?

Yes. [PEFC ST 2001 Trademark Rules](#) provide the requirements for using of PEFC trademarks, covering both on-product application and off-product (promotional use).

25. What is the purpose of using PEFC Trademarks?

PEFC Trademarks are used to:

- Communicate certified status to customers and consumers.
- Enhance market credibility and transparency.
- Support claims of responsible forest management and sourcing.

26. Where can PEFC Trademarks be used?

PEFC Trademarks may be used on:

- Certified products and packaging (on-product use).
- Promotional materials (brochures, websites, advertisements, business cards etc).

All usage must comply with the **PEFC ST 2001 Trademark Rules**.

27. Is approval required before using PEFC Trademarks?

Yes. All on-product and off-product uses of PEFC Trademarks require prior approval by MTCC as National Governing Body (NGB) in Malaysia.

28. What are PEFC Labels?

The PEFC labels comprise the PEFC logo plus additional elements such as the label name, the message, the website and the frame. The additional elements complement the logo providing information about what the PEFC logo stands for.

The PEFC logo shall be always used within the PEFC labels. Under certain circumstances described in this document, some elements of the PEFC labels may be omitted in such a way that the final design of the label is the PEFC logo itself, with no additional elements.

29. What are the types of PEFC on-product labels?

The PEFC certified label may be used whenever at least 70% of the forest and tree based material included in the product is PEFC certified material and the content of recycled material is lower than 100%.

Where the product does not include PEFC certified material from recycled sources, the label message may be used without the word “recycled”.

Where the product includes only material from PEFC certified forests, i.e. material delivered with the claim “100% PEFC Origin”, the label message may be used with the wording: “[This product] is from sustainably managed forests”.

The PEFC recycled label shall be used when the product includes only 100% recycled material content.

30. What is the PEFC off-product label?

The PEFC label may be used for promotional purposes on non-commercial products. It shall be clear what the PEFC label refers to on the non-commercial products. The promotional label message shall be included.

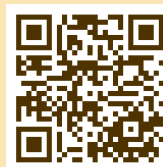

31. What are the classifications of PEFC Trademarks Users?

| PEFC trademarks user | On-product usage | Off-product usage |
|--|------------------|-------------------|
| Group A: National Governing Bodies | No | Yes |
| Group B: Sustainable forest management (SFM) certified entities | No | Yes |
| Group C: Chain of custody certified entities | Yes | Yes |
| Group D: Other users | No | Yes |

Group D covers organisations such as trade and industry associations, retailers, research and educational institutions, certification bodies, accreditation bodies, governmental organisations, NGOs, etc. Group D trademarks users are authorised to use the PEFC trademarks only for off-product purposes.

32. How do I apply for a PEFC Label?

Certified companies or Group D can apply for a free PEFC Label using the online [PEFC Label Generator](#).

33. Who should I contact for further clarification?

For guidance on PEFC Trademarks usage and approval, email coc@mtcc.com.my

BENEFITS OF COC CERTIFICATION

34. What are the benefits of PEFC COC certification?

- Support sustainable managed forests.
- Meet legality requirements.
- Meet private and public sector procurement requirements.
- Traceability solutions for wood-based materials.
- Largest source of certified supply.
- Support the Sustainable Development Goals.
- Usage of PEFC label.
- Fulfil certification requirements for export and import countries.

35. How does COC certification align with Environmental, Social, and Governance (ESG) reporting?

PEFC COC certification aligns closely with Environmental, Social, and Governance (ESG) reporting by providing a framework that supports sustainability and ethical practices:

- **Environmental:** PEFC COC certification ensures that forest-based products come from sustainably managed forests. This aligns with environmental goals in ESG reporting, such as reducing deforestation, conserving biodiversity, and promoting responsible resource use.
- **Social:** The certification includes requirements related to labor rights, health, and safety, as well as respecting the rights of indigenous peoples. These aspects contribute to the social component of ESG by promoting fair and ethical treatment of workers and communities.
- **Governance:** By adhering to PEFC standards, organizations demonstrate transparency and accountability in their supply chains. This supports governance objectives in ESG reporting, such as ethical sourcing and compliance with international standards.

OPERATIONAL & TECHNICAL SUPPORT

36. What support does MTCC provide for COC compliance

MTCC offers briefings for both existing and potential COC companies, alongside regular updates on PEFC standards and requirements. MTCC also provides training for auditors conducting MTCS certifications.

For further information, visit the [MTCC website](#) or email coc@mtcc.com.my

37. How often should we update our COC documentation?

As a minimum requirement, organisations must annually review all procedures during their internal review and surveillance audit. When changes occur in the organisation's supply chain, products, or processes, an immediate review becomes necessary.

LEGAL ALIGNMENT

38. Is PEFC certification in compliance with global timber legislation?

Yes, PEFC certification is designed to comply with major international timber legality regulations, including:

- European Union Timber Regulation (EUTR)
- US Lacey Act
- Australian Illegal Logging Prohibition Act
- Japanese Clean Wood Act
- UK Timber Regulation (UKTR)

These regulations universally emphasize behaviour modification through 'due diligence' or 'due care' in wood sourcing. For this reason, the revised Chain of Custody incorporates transparency and information availability as core elements in PEFC's Due Diligence System. Information on the origin and tree species of any supply in the Chain of Custody has to be accessible at ANY transaction point in the PEFC supply chain.

See more details in [PEFC GD 2001:2025 Chain of Custody of Forest and Tree Based Products and Related Standards – Guidance for Use](#).

39. Does PEFC covers the compliance against the European Union Deforestation Regulation (EUDR) to timber organisation?

Yes. The [PEFC ST 2002-1:2024 PEFC EUDR Due Diligence System](#) was published on 20 July 2024, to support organisations in demonstrating compliance with the EUDR.

40. Who needs PEFC EUDR DDS certification?

- EU-based operators/traders who placed relevant products on the EU market, or export these products from the EU
- Non-EU suppliers if their products ultimately enter the EU market through their direct or indirect customers.

41. What are the EUDR COC-related requirements that PEFC needs to align with?

The EUDR now requires Operators to provide geolocation data and harvesting date ranges within their Due Diligence Statements, which need to be presented by Operators as part of their DDS statement. PEFC is actively seeking potential solutions for certified organisations to meet these requirements.

Other alignment work includes:

- refining definitions of recycled materials,
- verifying technical accuracy of claims, and
- ensuring that the DDS system includes checks on deforestation and degradation as per the EU definitions.

42. Can businesses use PEFC COC certification to automatically comply with the EUDR?

Voluntary certification schemes cannot offer automatic compliance with EUDR as the legal liability always rests with the Operators and Traders. Through aligning PEFC standards to EUDR, PEFC will assist supply chain actors in their due diligence, risk assessment and data requirements for EUDR compliance.

43. What is the role of PEFC certification in relation to EUDR?

PEFC certification can be used as:

- Supporting evidence in the EUDR due diligence process.
- A tool to demonstrate low-risk sourcing practices.
- Part of a broader compliance strategy, but not a standalone solution.

44. What is the status of PEFC EUDR implementation in Malaysia?

MTCC formally adopted the PEFC EUDR DDS standard on 10 September 2024 as part of the standards under the MTCS.

List of Certification Bodies (CBs) Accredited to Conduct PEFC EUDR Due Diligence System (DDS) Audits (as of 31 December 2025):

- SIRIM QAS International Sdn Bhd
- SGS (Malaysia) Sdn Bhd
- Platinum Shauffmantz Veritas Sdn. Bhd.

45. Where can I find more information about EUDR?

Below are key resources for PEFC-specific guidance and EUDR compliance:

a) PEFC EUDR Resources

[PEFC EUDR Website](#) which provides access to the following:

- Overview of PEFC's alignment with EUDR, tools, and implementation steps
- PEFC EUDR DDS Standard (ST 2002-1:2024)
- Webinars & Training
- Technical Matters Newsletter
- Technology Partners
- PEFC EUDR FAQs

b) Official EUDR Resources

[EU Website](#) which provides the following:

- EUDR Legislation Text
- EUDR Implementation Support Tools (EU Forest Observatory, Country Benchmarking, Satellite Monitoring etc.)
- FAQs and Guidance Document

PEFC COC GROUP CERTIFICATION

46. What is PEFC COC Group Certification?

PEFC Chain of Custody (COC) Group Certification is a certification option that allows multiple organisations involved in the supply chain of forest-based products to be certified under a single PEFC CoC certificate, managed by a Group Manager. This approach is particularly beneficial for small and medium enterprises (SMEs) seeking PEFC certification in a cost-effective manner.

47. Who is eligible for PEFC COC Group Certification?

- Small and medium enterprises (SMEs)
- Companies with similar Chain of Custody processes
- Organisations operating at multiple sites
- Suppliers, manufacturers, traders, printers, and distributors of forest-based products

All group members must implement and comply with PEFC COC requirements.

48. What is the role of the Group Manager?

- Establishing and maintaining the group COC management system.
- Ensuring all group members comply with PEFC ST 2002 (Chain of Custody of Forest and Tree Based Products).
- Conducting internal audits and monitoring of group members.
- Managing corrective actions and membership records.
- Acting as the main liaison with the Certification Body.

49. What are the benefits of PEFC COC Group Certification?

- Reduced certification and audit costs through shared expenses.
- Simplified administration and documentation.
- Improved access to PEFC-certified markets.
- Consistent implementation of PEFC COC requirements across group members.

50. Which PEFC standards apply to COC Group Certification?

[PEFC ST 2002:2020 Chain of Custody of Forest and Tree Based Products – Requirements](#)

[PEFC ST 2001:2020 PEFC Trademark Rules – Requirements](#)

[PEFC GD 2001:2014 Annex 1 - PEFC chain of custody certification for specified projects, or 'Project Certification.](#)

51. How are audits conducted under COC Group Certification?

Audits are carried out by a PEFC-accredited Certification Body and include:

- Assessment of the Group Manager's COC management system
- Sampling audits of selected group members
- Annual surveillance audits and recertification audits

Not all group members are audited each year, but all members remain subject to audit.

52. How can an organisation join a PEFC COC Group Certification?

- Organisations may join an existing PEFC COC certified group, or establish a new group and appoint a Group Manager.

53. Conditions for Producer Group Participation under PEFC COC Group Certification

- The producer group is limited to participation of sites that are in the same country
- Have not more than 50 employees (full-time employees equivalent)
- Have a turnover of maximum of RM50 Million, or equivalent

PEFC COC PROJECT CERTIFICATION

54. What is PEFC COC Project Certification?

PEFC Chain of Custody (COC) Project Certification is a certification option that applies to a specific, defined project with a clear start and end date. It enables organisations to demonstrate that forest- and tree-based materials used in the project are sourced from PEFC-certified, recycled, or controlled sources, in accordance with PEFC requirements.

55. Who is PEFC COC Project Certification suitable for?

- Construction and infrastructure projects
- Property development projects
- Interior fit-out and refurbishment projects
- Organisations using PEFC-certified materials for a one-off or time-bound project

56. What types of products are covered under Project Certification?

Project Certification may cover forest- and tree-based products such as:

- Timber and wood-based materials
- Panels, flooring, and joinery
- Furniture and fixtures
- Paper-based products used within the project scope

57. What are the key requirements for PEFC COC Project Certification?

- A clearly defined project scope, timeline, and location
- Identification and control of PEFC-certified, recycled, or controlled materials
- Proper documentation and record-keeping for material purchases and usage
- Implementation of PEFC COC requirements relevant to the project

58. Which PEFC standards apply to COC Project Certification?

PEFC ST 2002:2020 Chain of Custody of Forest and Tree Based Products – Requirements

PEFC ST 2001:2020 PEFC Trademark Rules – Requirements

59. What is the validity period of a PEFC COC Project Certificate?

The certificate is valid only for the duration of the project, as defined in the certification scope.

60. What are the examples or PEFC COC Project?

- New build commercial and office buildings
- Private and social housing projects
- Renovation and refurbishment schemes
- Airports and railway stations
- Schools, playgrounds, skate parks, and sports arenas
- Boats and harbours
- Event and trade show infrastructure
- Civil engineering projects including bridges and tunnels and etc

61. Benefits of PEFC COC Project Certification?

- **Access to markets** – providing companies with competitive advantages for their PEFC certified projects in an increasingly environmentally-conscious world.
- **Inspire confidence** – allowing you and your project partners to make a bold statement of sustainability and sound ethical sourcing of timber and forest-based products.
- **Ease of implementation** – enabling Project Managers to take advantage of PEFC certification even if not all Project Members have obtained PEFC Chain of Custody certification
- **Compliance with legislation** – PEFC's Due Diligence System (DDS) excludes wood from conversions, illegal and other controversial sources.
- **Availability and choice** – two-thirds of the world's certified forest area is PEFC certified. That is currently more than 230 million hectares, offering the widest supply of certified forest and tree-based products
- **Business leadership on sustainability** – businesses acquire a competitive advantage over competitor

PEFC ESG (ENVIRONMENTAL, SOCIAL, GOVERNANCE)

62. What is ESG and why is it important for businesses?

PEFC (Programme for the Endorsement of Forest Certification) supports Environmental, Social, and Governance (ESG) goals by providing a framework for sustainable forest management and traceable supply chains, helping companies meet investor demands, regulatory requirements and consumer preferences for responsibly sourced wood, paper, and other forest and tree-based products, thereby enhancing their brand value and reporting on climate mitigation and social responsibility.

63. Can PEFC COC certification be used as evidence for ESG reporting?

Yes. PEFC COC certification can be used as credible, third-party verified evidence to support ESG disclosures, sustainability reports, and annual reports. It provides assurance on responsible sourcing, supply chain transparency, and compliance with internationally recognised sustainability standards

64. Learn how PEFC helps businesses thrive sustainably. Download the brochure:

[Download the brochure to learn more.](#)

PEFC SDG (SUSTAINABLE DEVELOPMENT GOALS)

65. What are the Sustainable Development Goals (SDGs)?

The United Nations Sustainable Development Goals (SDGs) are 17 global goals adopted to promote sustainable development by balancing environmental protection, social inclusion, and economic growth. Businesses play a key role in achieving these goals through responsible practices and sustainable supply chains.

[Learn more about how MTCC supports the Sustainable Development Goals \(SDGs\).](#)

66. How does PEFC support SDGs?

PEFC COC certification supports the SDGs by ensuring that forest-based products are sourced from sustainably managed forests and responsible supply chains. It provides third-party verified assurance that environmental, social, and governance principles are embedded throughout the production and supply chain process

67. Can PEFC COC certification be used as evidence for SDG reporting?

Yes. PEFC COC certification can be used as credible, third-party verified evidence to support SDG-related disclosures in:

- Sustainability and ESG reports
- Annual reports
- Corporate responsibility statements

[Download the brochure to discover PEFC's commitment to all 17 pillars of the Sustainable Development Goals \(SDGs\).](#)

68. How can MTCS/PEFC Certification add value to your company?

- Ensures responsibly sourced materials, supporting your sustainability goals.
- Boosts ESG credentials, enhancing your corporate responsibility profile.
- Provides access to environmentally conscious markets, aligning with global trends in sustainability.
- Improves supply chain security, reducing risks from unsustainable sources.
- Contributes to Malaysia's Roadmap towards Sustainable Development Goals (SDGs) by 2030.
- Supports Malaysia's commitment to international conventions and treaties related to sustainability.

PEFC-CERTIFIED PAPER-BASED PRODUCTS AND PACKAGING

69. Why is PEFC certification important for paper-based products and packaging?

PEFC certification assures customers and stakeholders that the products:

- Come from responsibly managed forest sources
- Support environmental protection and biodiversity
- Respect social and labour requirements
- Are produced through transparent and traceable supply chains

70. What types of paper-based products and packaging can be PEFC-certified?

PEFC certification covers a wide range of paper-based products and packaging, including:

- Paper and board
- Cartons and boxes
- Corrugated packaging
- Labels, envelopes, and bags
- Printed paper products and packaging materials

71. Can the PEFC label be used on paper-based products and packaging?

Yes, the PEFC label may be used provided that:

- The product is covered by a valid PEFC COC certificate
- The correct PEFC claim is applied
- Label use complies with ST 2002:2020 PEFC Trademarks Rules

72. What PEFC labels can be used on paper-based products and packaging?

Depending on material composition and claims, products may carry:

a) PEFC Certified Label

b) PEFC Recycled Label

The applicable label depends on compliance with standards [PEFC ST 2001:2020](#) – [PEFC Trademarks Rules](#) – [Requirement](#)

RECYCLED MATERIAL

73. What is PEFC recycled material?

Forest and tree based materials that is:

- Recovered from waste during a manufacturing process
- Generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product that can no longer be used for its intended purpose

74. How is recycled material certified by PEFC?

Recycled materials are certified through the PEFC Chain of Custody (COC) system, which tracks materials through every step of production, processing, and distribution. This ensures that claims of recycled content are verifiable and credible.

75. Can PEFC recycled material carry the PEFC label?

Yes, products containing 100% PEFC recycled material content can carry the PEFC Recycled label.

76. What types of recycled material can be PEFC certified?

PEFC certification can cover:

- Paper and cardboard (including box packaging, A4 paper, magazines, book).
- Wood products (such as panels or furniture components).
- Other forest and tree based products

MALAYSIAN TIMBER CERTIFICATION COUNCIL

The Malaysian Timber Certification (MTCC) is an independent organisation that develops and operates the Malaysian Timber Certification Scheme (MTCS). MTCS is endorsed by the Programme for the Endorsement of Forest Certification (PEFC), the biggest forest certification program globally, covering over 300 million hectares of certified forests worldwide.
